

The CHILD Project: Road to Resilience

R2R improves the coordination of care and provides special support for parents and connection to a variety of services available to families. The program provides an in-depth assessment to identify any needs parents might have and timely referrals to a variety of local resources and supports.

An in-clinic navigator visits clients at the medical clinic, or in the community, to discuss individual needs and the R2R program. Pregnant women or those with a 0-12 month old, are offered direct connection to services on-site, at CommuniCare (CCHC) Perinatal Clinics across Yolo County or in-community at a referring partner agency, and more intensively in-home.
